

GLOOK Recipe

Mix well in a cup or suitable container:

- 4 tablespoons white glue *
- *If dyeing *Glook*, add food coloring to glue FIRST.
- 4 tablespoons water

Mix well in a separate container:

- 2 teaspoons Borax powder
- 1 cup warm water

Pour the glue solution into the container with the Borax solution and stir.

After stirring for a while, a glob of slime should start to form. Poke any bubbles with your stirrer.

Take the glob out and use your fingers to massage and mix the ingredients more.

Knead the mixture until it no longer feels wet. It should be malleable like *silly putty*, but softer and not as rubbery.

Repeat the process for additional batches of *Glook*. You may want to use different colors.

Store the *Glook* in a sealable bag to prevent it from drying.
